

# Teachers that Mean Business

Thank you for visiting the company's newest link – "Teachers that Mean Business." This page represents a shared vision between *Moore's Reminders, LLC* and *Paperwork Solutions*. Our goal is to increase awareness among K-12 teachers about other businesses that have been established by teachers.

Companies developed by educators are different. Individuals who actually teach in the classroom and understand the true needs of teachers and students started them. Working in their own schools, they have discovered effective, meaningful ways in which to solve their problems. Their products and services have already been proven where it matters most – in the K-12 classroom – and not necessarily the corporate boardroom! That is why the information on this link is so important.
