

Happy Mardi Gras!

Paperwork Solutions

February 2009 Environmental Protection Agency (EPA)\* Bulletin  
"The publication for conservation and global warming education"

This month's environmental bulletin acknowledges our nation's K-12 teachers' needs for increasing documentation speeds without cutting down more trees or planting more seeds. Regrettably, pencils are made up of mostly wood. Paper is also derived from wood, a scarce dwindling natural resource. Equally

troubling is the fact that pens are made up of ink and plastics, which are both pollutants! In order to better protect and conserve our forests and other natural resources, the United States Environmental Protection Agency (EPA)\* strongly encourages the adoption of *Paperwork Solutions* database programs for educators at all levels. Teachers may

now use customizable scroll menus, check boxes and radio buttons to create documents. Afterwards, they may save the exact document(s) as PDF files and attach and deliver them via e-mail. There is no need for pencils, pens, or even paper (wood). Therefore, our planet's precious trees are not needed either! Documentation may now be achieved effortlessly in a cost-saving, time saving, and environment-friendly manner using *Paperwork Solutions!*

**OPEN 24 HOURS**

Please call 251-604-1663 or visit the company's web site @ [www.PaperworkSolutions.com](http://www.PaperworkSolutions.com) to learn more benefits and advantages of using *Paperwork Solutions'* K-12 database programs.

Save Time    Save Money

Save Time
